

NEEV

The First Step Toward Mastering FPV.

APPLICATIONS

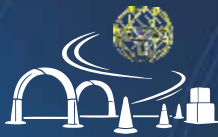

Defence personnel FPV familiarization and pilot training.

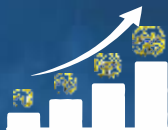

Beginner drone pilot training.

FPV flight schools and training academies.

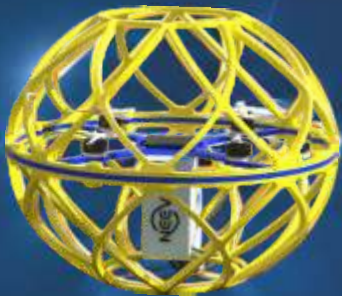

Practical drone handling and maneuvering practice.

Skill development from basic to advanced FPV flying.

Neev is a lightweight, in-house designed and manufactured FPV training drone developed by SANH Systems for defence personnel, drone training institutes, and beginner pilots.

Its innovative, soccer-ball-inspired protective structure is designed to minimize damage during training, helping new learners build essential flying skills with greater confidence and reduced repair requirements.

300g

APPROX. WEIGHT

11-15mins

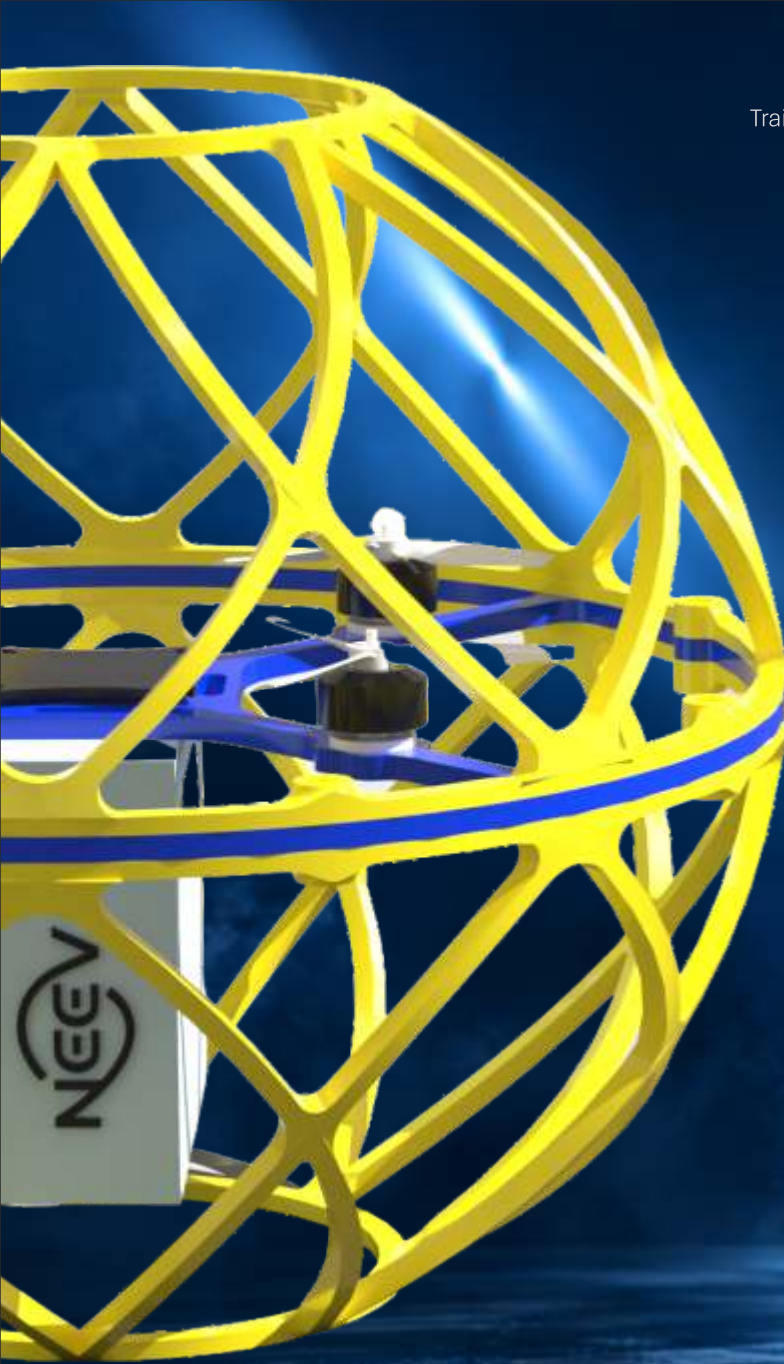

FLIGHT TIME
